Competition

Autonomous underwater robotics is an exciting challenge in engineering, which participants get to experience at SAUVC. The competition is a great learning ground for participants to experience the challenges of AUV system engineering and develop skills in the related fields of mechanical, electrical and software engineering.

Guest speakers

The competition will also feature workshops and lectures from world renowned experts in the field of marine robotics and autonomous underwater systems to inspire participants with new ideas and techniques to solve challenges and build an interest in careers related to marine robotics.

Mentorship

Participants will have access to mentors and support. Teams will be assigned mentors who will be able to provide mentorship and technical guidance as the teams work on designing and building their AUV. SAUVC emphasises softskills, learning and skill development and we want to ensure our participants grow through the course of SAUVC.

Get together

The competition is also about meeting others like us, who are also interested in underwater robotics and autonomous systems, to get to know one another, to share ideas and make connections.

SAUVC 2024 Winners

Champion

NTU team (Champion 2024)
Singapore University of Technology and Design

1st Runner-up

Team ABYSS (IN64)
Bannari Amman Institute Of Technology & Institution
Sathyamangalam, India

2nd Runner-up

Mecatron (SG45)
Nanyang Technological University
Singapore
